PROBLEM & SOLUTION

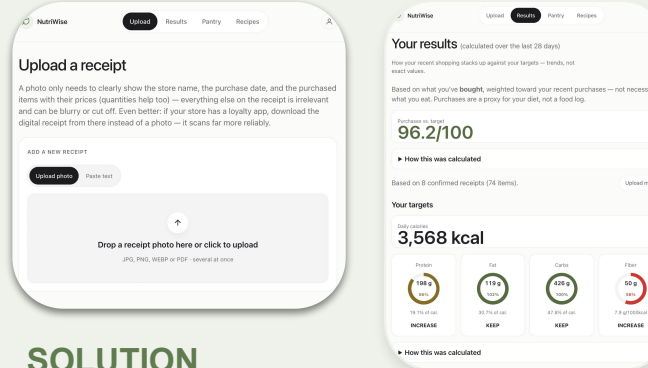

The gap we close

PROBLEM

Logging kills the habit

- › Every app = type in every meal
- › Habit dies in weeks → people quit
- › No effortless record of eating

SOLUTION

Receipts log for you

- › Snap receipt → pantry auto-fills
- › Tap what you ate, no typing
- › Gaps + recipes

VISION

Eating better, zero extra effort

MISSION

Turn receipts into nutritional insights

TARGET GROUP

Who it's for

DIETARY RESTRICTOR

Proof it works

Sara, 25 · vegan

- › Vegan/veggie/allergies
- › "Vegan = default, not checkbox"
- › Unsure on iron, omega-3, B12

BUSY PROFESSIONAL

No time, low friction

Tobias, 38 · 2 kids

- › "Just tell me what to do"
- › Hates daily input
- › Pays for time, not complexity

EARLY ADOPTER

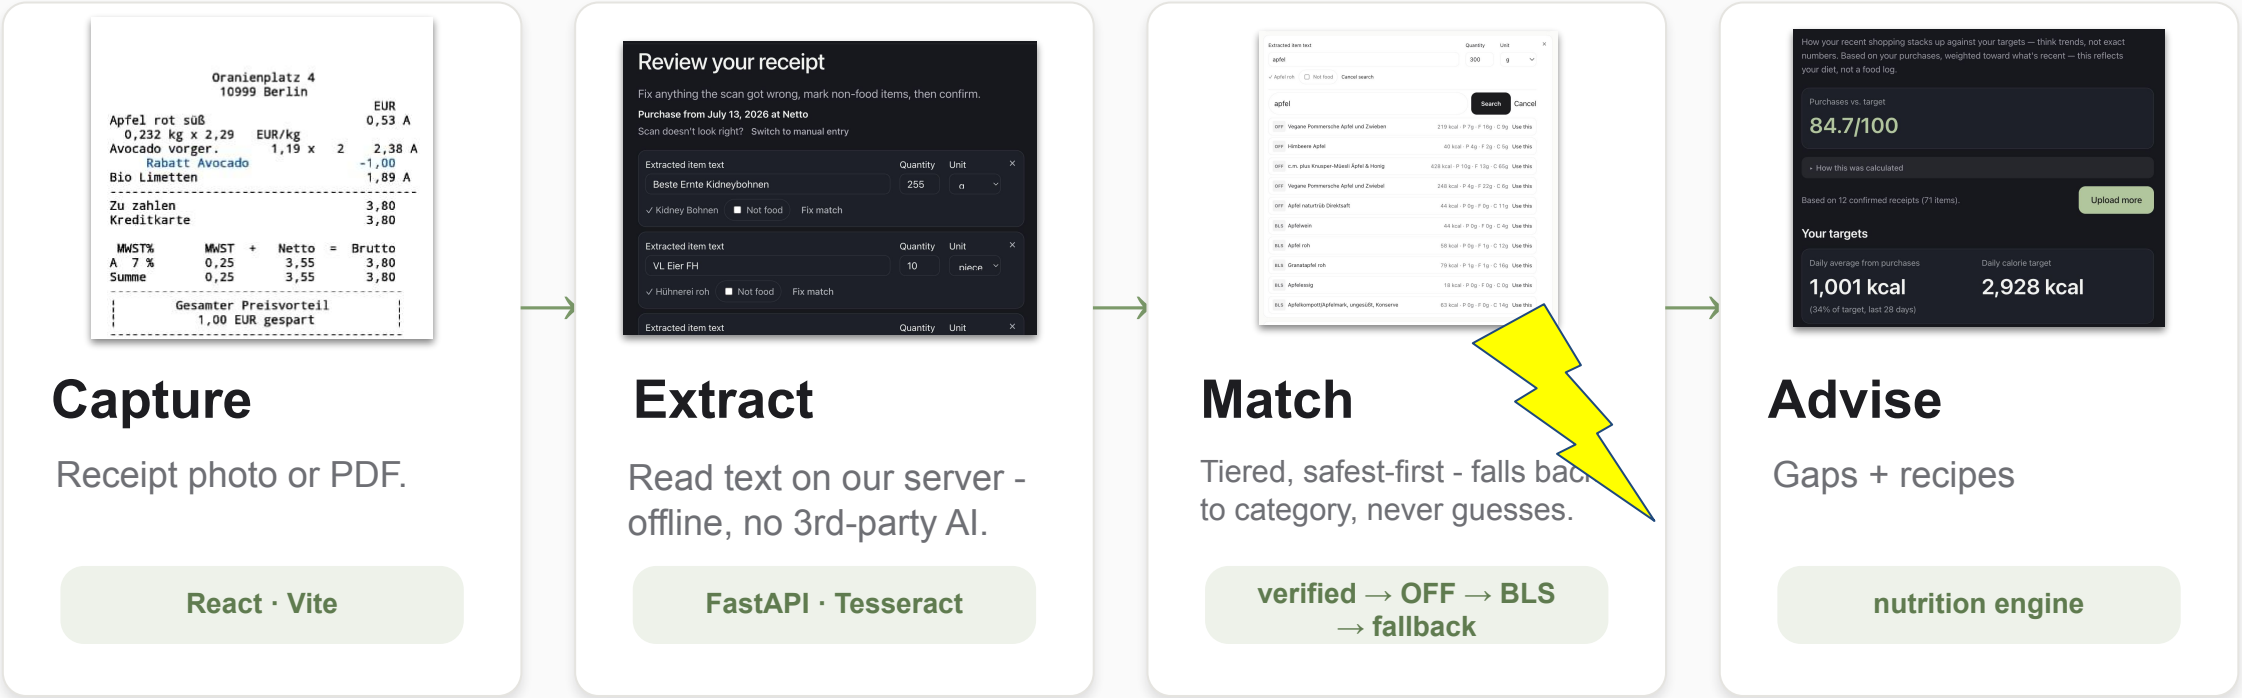

Feel "enough"

Lena, 29 · gym 3×/wk

- › Design quality = dealbreaker
- › Hates calorie counting
- › Wants control, not a 2nd job

Examples above · Core group: Health-minded adults, 25-60+, in Germany.

From a photo to smart recipes

Privacy by design: OCR runs on our own backend - receipts never touch a third-party AI · per-user data isolation · GDPR account deletion. **Matching is 100 % rule-based and fully auditable - no AI guesswork.**

Matching Problem

BLS	Mettwurst luftgetrocknet, energiereduziert	218 kcal · P 26g · F 12g · C 0g	Use this
BLS	Mettwurst luftgetrocknet	262 kcal · P 25g · F 18g · C 0g	Use this
BLS	Schinkenplockwurst/Schinkenplockwurst luftgetrocknet	243 kcal · P 26g · F 16g · C 0g	Use this
BLS	Schokoladeneis	232 kcal · P 4g · F 10g · C 29g	Use this
BLS	Walnusseis	240 kcal · P 3g · F 13g · C 27g	Use this

Matching Investigation

- include user-verification
- expand fallback categories (from 7 to 87)
- search in verified matches first, then use OFF/BLS, then fallback

OUTLOOK

What runs today — and what's next

LIVE TODAY

The loop runs

- › Receipt → pantry → gaps → tip
- › Check-off · freshness-aware pantry
- › AI Recipes
- › Multi-user

NEXT · PRODUCT

Broaden & sharpen

- › Nutritional AI coach
- › Native iOS & Android apps
- › Shopping list from store offers
- › Smarter matching - verified-first + more categories

NEXT · GROWTH

Partnerships

- › Statutory-insurer bonus programs - prevention, GDPR-fit
- › Corporate health / BGMs
- › Retail: offers to users (affiliate, privacy-safe)
- › Dietician sign-off

The bet: Do people **trust a receipt-based tip** enough to **change what they buy next**? Does the **check-off habit** stick?

NUTRIWISE

PROJECT & APP

GitHub

WebApp

Appendix: Personas · Tech Stack · Data Flow · Business Model

APPENDIX · PERSONA

Sara Bauer, 25

Master's student · Munich · Vegan 2 years

Dietary Restrictor

DAILY WORKFLOW

- Cooks most meals (ethics + budget)
- ~8-dish rotation, narrow
- Reads labels · B12 (unsure of dose)

DECISION-MAKING

- Researches ethics + privacy policies
- Active in vegan groups & Reddit
- Rejects "vegan filter" apps

PSYCHOLOGICAL DRIVERS

- Diet = identity & values
- "Am I actually healthy?"
- Reacts badly to preachy apps

BIGGEST FRUSTRATIONS

- "Vegan = checkbox, not default"
- Constant chicken protein recs
- Iron/omega-3/zinc — contradictory answers

SECRET MOTIVATION

Shut down "but where do you get your protein?" — with data proving she's healthier than they are.

APPENDIX · PERSONA

Tobias Kramer, 38

Project Manager · Hamburg · Married, 2 kids, no time

Busy Professional

DAILY WORKFLOW

- Out 7:30–19:00 · kids need dinner
- Leftovers or fast food; desk sandwich
- Cooks only weekends (2 of 14 meals)

DECISION-MAKING

- Buys on trusted recommendation
- Too busy to research
- Pays for time — complexity is the barrier

PSYCHOLOGICAL DRIVERS

- Good role model, no life overhaul
- Runs work life in Notion — likes systems
- Would engage if friction is low

BIGGEST FRUSTRATIONS

- "No 2 hours to figure out eating well"
- Quit MyFitnessPal after 4 days
- Hates apps needing daily input

SECRET MOTIVATION

Scared of getting sick — dad's heart attack at 55. The cholesterol comment landed hard. Wants to hear he'll be fine.

APPENDIX · PERSONA

Lena Müller, 29

UX Designer · Berlin · Lives alone, gym 3×/week

Early Adopter

DAILY WORKFLOW

- Skips breakfast · lunch near office
- Tracks workouts in Strava, never a macro
- Meal-preps ~monthly · saves unused recipes

DECISION-MAKING

- Tries 3 apps free before committing
- Reads reviews obsessively
- Ugly app = instant no

PSYCHOLOGICAL DRIVERS

- Control without a second job
- "Someone who works out" = identity
- Nutrition feels overwhelming, shameful

BIGGEST FRUSTRATIONS

- "Eat healthy but always tired"
- Hates calorie counting
- Apps feel built for bodybuilders / ED

SECRET MOTIVATION

Stop feeling guilty about food and still look good. An app that makes her feel she's doing enough is the win.

What it's built with

Frontend

React 19 · React Router 7 · TypeScript · Vite 8

Backend

FastAPI · Uvicorn · Pydantic v2 · Python 3.11

OCR

Tesseract · PyMuPDF · OpenCV · offline on our server

Matching / data

BLS 4.0 · OpenFoodFacts · tiered resolver

Storage

Supabase · PostgreSQL · per-user isolation

AI (optional)

Gemini 2.5 Flash · recipes only

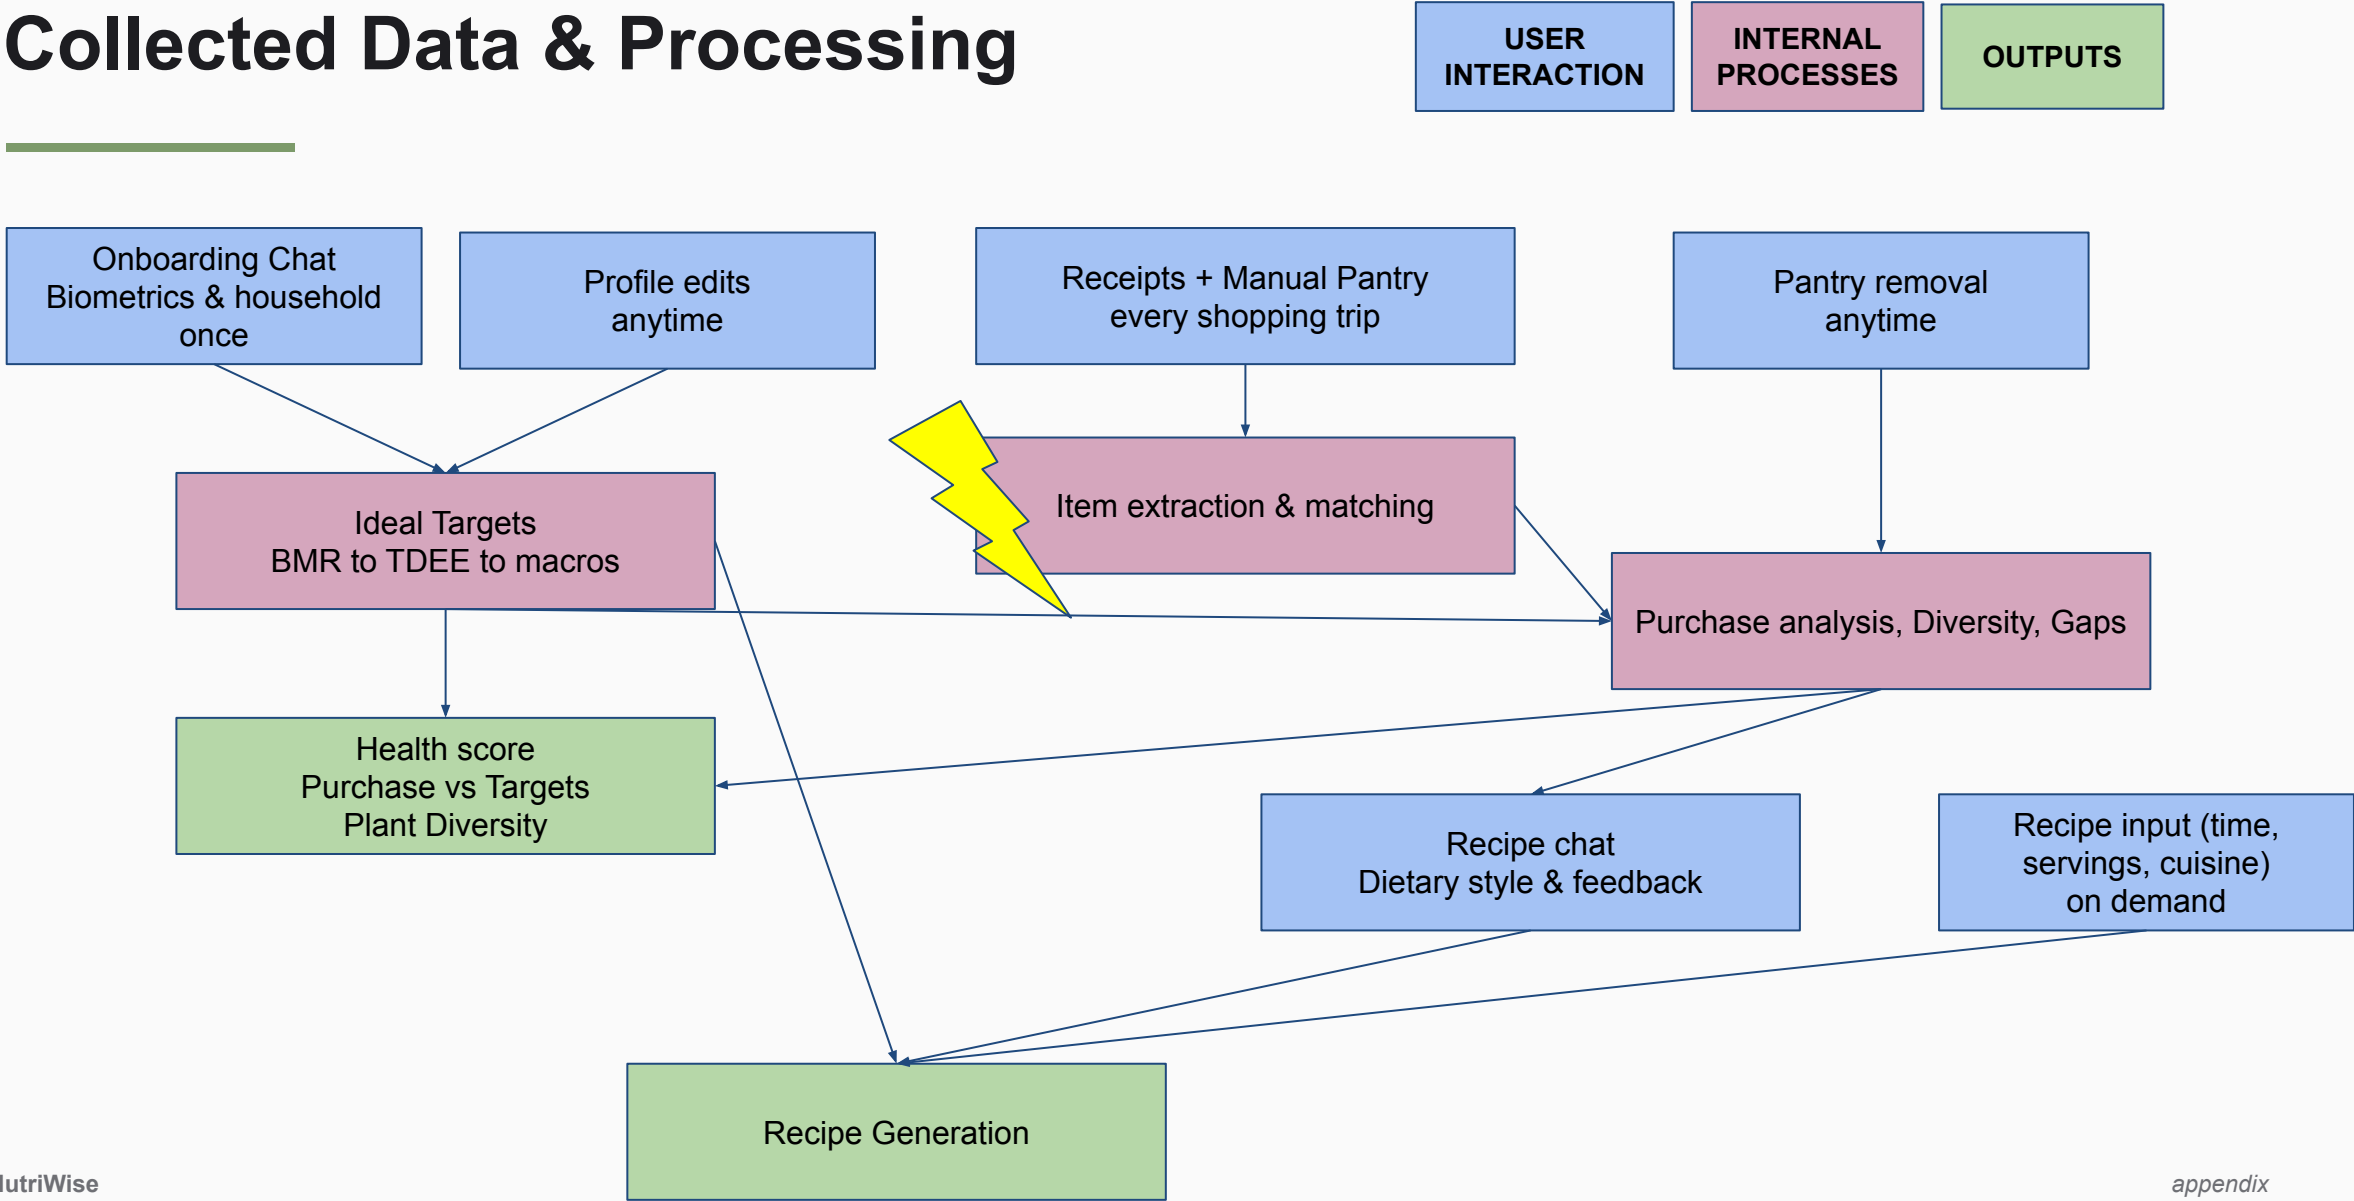

Deploy / Infra

Docker · Render · GitHub Actions CI

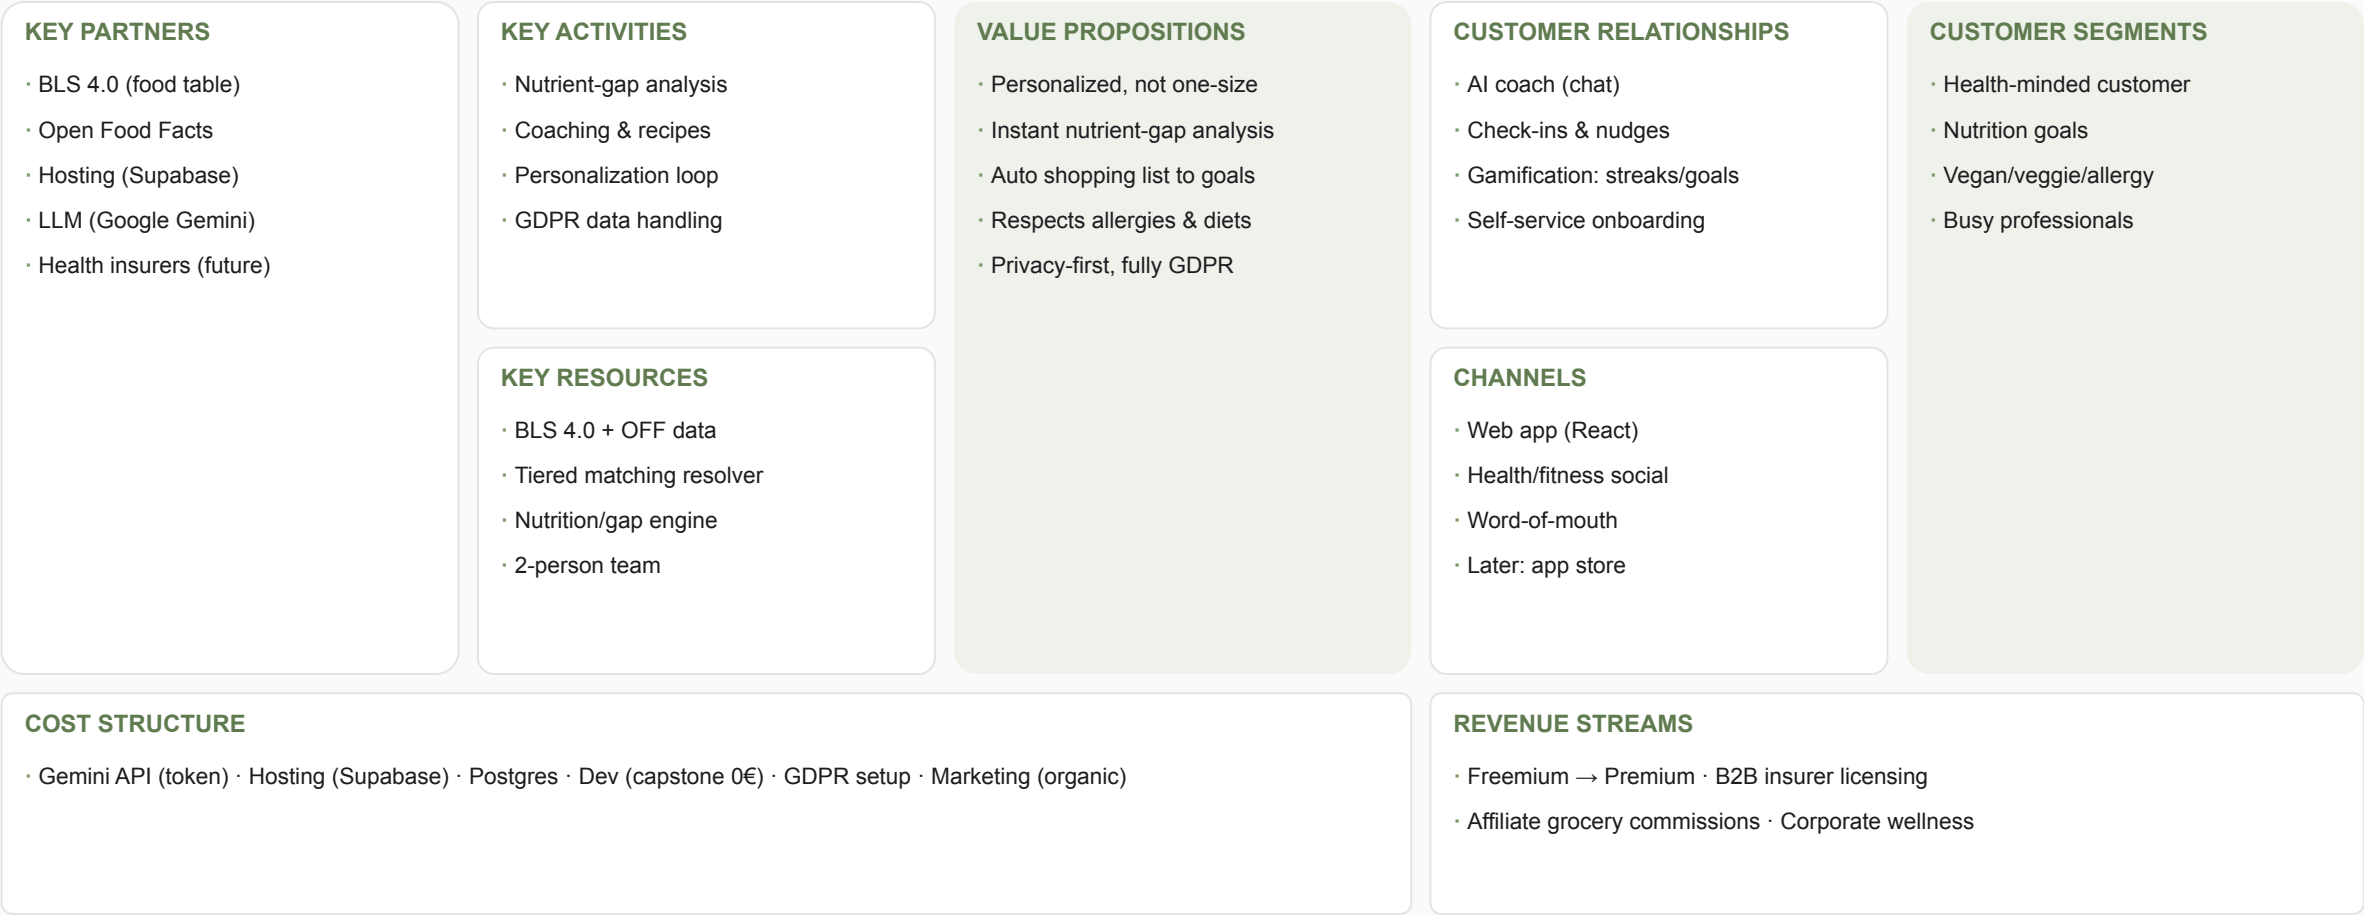

Tooling / CI

pytest · ruff · ESLint · Prettier · pre-commit · GitHub Actions

Collected Data & Processing

Business Model Canvas

Reflects the built product stack — BLS 4.0 · Open Food Facts · Supabase · Gemini · React.
